

## **Letter of Recommendation**

I would like to strongly recommend Ayush Adhikari for admission to the graduate program at your university. I have known Ayush for about 2 years now as an undergraduate student in Computer Engineering. I taught him Computer Graphics.

I recall Ayush as a confident and responsible student. In fact, he was the topper of his batch in Computer Engineering. As an instructor and his supervisor too I had enough opportunity to observe his capabilities closely.

I supervised him in his project DNN. I could observe his keen interest and aptitude for research while working on the project.

I have noted his outstanding presentation skills while he presented his work at our department as well as in the conference. He is a very hardworking student who is always eager to learn. He is very helpful and cooperative student. He eagerly handed over his project work to his juniors who wanted to further continue the research on the topic along with proper guidance and resources. I have also been impressed by his communication skills during project presentations and lectures.

I appreciate his technical and professional skills. Besides academics, he was also involved in several extra-curricular activities. He participated in various competitions organized in and off the campus. Unlike, most students who limit their project to an academic exercise, he actually deployed his project publicly in our server and maintained it. He has worked in some IT companies which, I believe, has further added to his technical skills and professional experience.

I am quite confident that Ayush's skills coupled with academic capability will make him a good candidate for your university. Thus, I would highly recommend him for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required.

Dr. Anup Aryal,  
Professor,  
Department of Electronics and Computer Engineering
