

Letter of Recommendation

I would like to recommend Ayush Adhikari for admission to the university. I have known Ayush Adhikari for about 2 years now as an undergraduate student in Computer Engineering. Moreover, I was the supervisor for his final year project. I taught him subjects.

I recall Ayush Adhikari as a student. he maintained excellent academic performance throughout his undergraduate ranking among the students of his batch. As an instructor and his supervisor too I had enough opportunity to observe his capabilities closely.

I was the supervisor in his project titled. I was quite impressed by his hardworking nature and learning capability. I supervised him in his project. I could observe his keen interest and aptitude for research while working on the project. In fact, he was also able to publish a paper on title.

Dr. Anup Aryal,

Professor,

Department of Electronics and Computer Engineering

Pulchowk Campus, Institute of Engineering, Tribhuvan University
